

U-Value plus+

The focus of today's property owners, designers, building developers and contractors is to build environmentally sustainable buildings, using the latest energy efficient building materials. Improving the thermal performance of the building envelope with the NUDURA U-Value Plus inserts combined with our Insulated Concrete Form wall system is the easiest, most immediate and cost-effective way to reduce energy costs.

The NUDURA U-Value Plus inserts allow the ability to customize the desired amount of insulation needed to meet the specific requirements of any project. The inserts are available in 3 standard sizes of 50mm, 102mm and 150mm. Custom combinations can be created to provide further insulation value if desired and are compatible with all sizes of forms offered by NUDURA, with Core sizes ranging from ranging from 100mm to 300mm.

The U-Value Plus inserts were engineered to integrate into any NUDURA Form unit, allowing the for increased U-Values, while at the same time not interfering with the unique technological characteristics of NUDURA Forms. The NUDURA line of forms offer innovation that is exclusive to NUDURA, which allow builders, architects and engineers the ability to build and design commercial and residential structures with greater efficiency. The DURAFOLD, DURAMAX and DURALOK Technology™ along with our 4-Way Reversible system, offer Patented Technology that is only available from NUDURA, in all Form types and sizes.

Using the U-Value Plus insert is easy. Once the desired size is chosen the U-Value Plus insert is simply slid into one side of a NUDURA Form Unit. With the unique dovetail system, the inserts are easily placed during the construction process. Because of the unique form attributes that NUDURA offers, the speed of construction is increased over conventional building methods and other insulated concrete form products on the market. The unique form attributes provided by NUDURA also decrease labour costs, while providing superior performance. With the U-Value Plus inserts NUDURA provides U-Values that meet and exceed code for sustainable homes and offer U-Values from U 0.17 to as low as U 0.11.
